Molded: Extruded: Stamped
SEALING SOLUTIONS
S&H Rubber is a world-class, versatile supplier of custom molded and rubber extrusion products. Among our high-quality products and rubber extrusions are: airplane seals, bellows, bushings and molded gaskets. Our products are produced in our tried and true facility in Fullerton, CA, spread over 10,000 square feet of manufacturing space.

Starting out as a small company in 1967, we have expanded our capabilities considerably. We pride ourselves on our ability to meet the needs of all our customers, old and new. It is in line with this philosophy that we work so hard to make sure our customers are happy with our products as much as with our service. Over the forty years we have been in business, the S&H brand has become known for its superior quality, quick turn-around and competitive pricing.

Our Mission is to promote open communication between employees and customers, challenging the industry on quality, delivery, profitability and positive morale.

S&H Rubber does high volume commercial stamping of metallic and non-metallic gaskets, washers and shims

S&H Rubber manufactures molded and extruded rubber parts. With our diverse equipment, we can run one part to one million. Our numerous molding presses allow us to be versatile for quick set-ups and turn-around delivery. We have ready sources for numerous SPEC materials and we are established on several GPL-qualified product lists.

Materials we can work with include:
- SBR
- Neoprene (Chloroprene Polymer)
- EPDM (Ethylene Propylene)
- Buna-N (Nitrile)
- Natural Rubber
- Butyl
- Hypalon
- Urethane
- Silicone
- Fluorosilicone
- Fluoroelastomer
- Viton®
- Thermoplastic Rubber
- FDA Rubber

Our goal is to be your first choice...
Products proudly MADE IN THE USA
Our Quality Control System utilizes continuous improvement techniques and is designed around our customer standards. S&H Rubber’s Quality Management System is certified to the latest ISO 9001 and AS9100 standards. We keep it simple by focusing on Lean Techniques and Closed Loop corrective actions.
